2 1/16" x 3 5/16"

Horizontal slot pin
pouch size
2 5/8" x 3 3/8"

Badge Size
2 5/16" x 3 1/2"

ID Card Color Selection Chart

Select two or more IDenticard colors to make your cards vivid, attractive and distinctive. Or, choose other PMS colors.

For greater durability, avoid solid colors along the card's edges. Solid ink coverage impairs bonding.

Reverse white and standard background screens are available at no extra charge.

Black is considered a color.

IDenticard Background Screens

Add a distinctive look to your ID cards and badges.

Choose from four distinctive background screens:

- IDentiwave – IDenticard's exclusive security screen
- Geometric
- Fisheye
- Line Tint

IDenticard background screens give the appearance of a colored background without significantly impairing the card's bonding strength.

Screen colors can be varied for color coding different employee, staff, student or visitor groups.

Screens are printed in 10% or 20% depending on card material.

Note: Because your card will be printed on a different material than this page, and because lamination will affect color perception, these colors should be used only as a guide. Although we have considerable skills and experience in matching colors, it is impossible to guarantee an exact reproduction.
